VALECHA ENGIN	BULLISH	BULLISH	BULLISH	98	BUY	207.8		241

How Profit from the Multiple Time Frame Trend Trading Newsletter

Nomenclature:

Security Name: Name of a stock or index.

TRENDS:

There are two kind of trends, BULLISH or BEARISH.

BULLISH: A bullish trend exists when we have rising prices.

BEARISH: A bearish trend exists when we have falling prices.

Time Periods of Trends:

Trends exist in long, medium or short term time frames.

LONG: Long term trends typically last for months to years.

MEDIUM: Medium term trends typically last for weeks to months.

SHORT: Short term trends typically last for days to weeks.

RS (Relative Strength): The RS indicates how a security is performing relative to all the other securities in the market. Relative strength is a numerical measurement expressed as a percentage. For example, if a stock has a relative strength of 75 it has outperformed 75% of the stocks over a specified period. A high reading indicates that the price of the security is rising faster (outperforming) than the overall market. A lower reading indicates that the price of the security is underperforming compared to the other stocks in the market. For example, a stock with a relative strength of 90 has experienced a greater increase in its price than the price increases experienced by 90% of all other stocks on the market. Alternatively a stock with a relative strength reading of 30 would indicate that it has only managed to perform better than 30% of the stocks in the market. As a general rule it is always better to go long in stocks with a RS reading greater than 50.

After the identification of the long, medium and short term trends the RS is one of the most valuable tool for any trader or investor. The RS reading identifies which stocks are stronger and how much they are stronger than the others. Thus the RS provides superior returns by identifying stocks that are experiencing strong upward momentum with the expectations that the stocks will continue to be strong.

SIGNAL: Indicates wheather to BUY or SELL the security.

If you do not have an existing position in the markets and would like to open a new position, please follow the instructions mentioned below under "How to Select the most profitable Signals".

If you already have an existing long (BUY) position, then close your position on a SELL Signal. Alternatively if you have an existing short (SELL) position, then close your position on a BUY signal.

CLOSE: The last closing price of the security.

STOPLOSS: This is the stoploss level for the current day. A stop loss is designed to limit an investor's loss on a security position. When a security does not perform as expected and moves in the opposite direction, the stop loss helps to limit your maximum loss to the difference between your entry price and stoploss level.

Previous Signal: This indicates wheather the previous SIGNAL was a BUY or SELL.

Days Since: Indicates the number of trading days since the Previous Signal was triggered.

% Return: Indicates the % Return (Profit or Loss) since the Previous Signal was triggered.

52 Wk High: Highest price of the Security in the last 52 weeks.

52 Wk Low: Lowest Price of the Security in the last 52 weeks.

A. Volume: Average daily volume (in thousands) calculated over the last 5 trading days.

How to Select the most profitable Long BUY Signals

When a security triggers a "BUY" in the SIGNAL column, your selection should be based on any of the four conditions mentioned below:

- 1) Bullish Long Term Trend + Bullish Medium Term Trend + Bullish Short Term Trend + Positive RS
- 2) Bullish Long Term Trend + Bullish Medium Term Trend + Bullish Short Term Trend
- 3) Bullish Long Term Trend + Bullish Short Term Trend + Positive RS
- 4) Bullish Medium Term Trend + Bullish Short Term Trend + Positive RS

How to Select the most profitable Short SELL Signals

When a security triggers a "SELL" in the SIGNAL column, your selection should be based on any of the four conditions mentioned below:

- 1) Bearish Long Term Trend + Bearish Medium Term Trend + Bearish Short Term Trend + Negative RS
- 2) Bearish Long Term Trend + Bearish Medium Term Trend + Bearish Short Term Trend
- 3) Bearish Long Term Trend + Bearish Short Term Trend + Negative RS
- 4) Bearish Medium Term Trend + Bearish Short Term Trend + Negative RS
